

METY

Luxurious Shiny Metallic Thread

Shimmering Metallic Thread

If you are looking for a sparkling effect, METY is the right choice for beautiful ornamental seams and noble shiny embroideries. This metallized polyester/polyamide thread can be sewn and embroidered even at high speeds. Two strengths are available: 5/2 as thicker, 7/2 as thinner version.

GUNOLD[®]

Processing Recommendations:

- ◆ **Thread Tension:**
As for all metallic threads, a loose thread tension is extremely important.
- ◆ **Thread Unwinding:**
Make sure to slip the provided thread net over the cone before you start embroidering. This will guarantee even thread unwinding.
- ◆ **Needle:**
Use universal needle Organ 75/11 SES or special needle for metallic threads Organ DBx7ST strength 75/11 SES in case of difficulties.

- ◆ **Bobbin Thread:**
For best results, use BOBBY SYN 120 or 130.
- ◆ **Design:**
Best effects can be achieved in large-scale patterns, but it's also suitable for very fine embroideries.

Care Instructions:

Technical Information:

- ◆ **Upper thread**
- ◆ **Composition:**
Metallized polyamide/polyester thread. The core of the thread is made of polyamide, the coating of metallized polyester.
- ◆ **Size:**
 - 7/2 (2ply Final strength: Nm 75; dtex 133
 - 5/2 (2ply) Final strength varies according to colour: Nm 47-50; dtex 181-215

- ◆ **Minimum order:**
 - 1 Miniking Cone of 1.000 m
 - 1 Cone of 5.000 m

Tips from our experts:

- Size 7/2 is the thinner metallic thread; this size is closer to a 40 wt thread (stitch density for 40 wt thread).
- Size 5/2 is the somewhat heavier metallic thread; this size is closer to a 30wt thread (stitch density for 30wt thread).
