

POLY FLASH

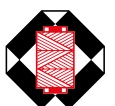

Metallic Shiny Polyester Thread

A Hybrid Among Polyester Threads

POLY FLASH brings a new look to textile surface design. The result of innovative manufacturing is indeed surprising since POLY FLASH combines the properties and look of polyester, viscose and metal in a single thread: It is as strong and as resistant to chlorine as polyester (POLY), but has the silky soft shine of viscose (SULKY) and the shimmering sheen of metallic thread (METY). The look of POLY FLASH is metallically shiny, looks like hammered metal, rather frosted than high-gloss, used, broken in a vintage style. This specialty thread is very skin-friendly, easy to work with and as the new sister of METY, SULKY and POLY it has indeed the potential to become a top seller!

GUNOLD[®]

POLY FLASH

Processing Recommendations:

- ◆ **Needle:**
Use universal Organ needle No.75/11 SES.
- ◆ **Bobbin Thread:**
For best results we recommend BOBBY SYN 130 or BOBBY FIL 110L.

Care Instructions:

Technical Information:

- ◆ **Upper thread with a high gloss**
- ◆ **Material:**
100% Polyester
- ◆ **Size 40:**
final strength: Nm 50 (2ply);
dtex 195 (2ply)

POLY FLASH combines the properties and look of polyester, viscose and metal in a single thread.

Range of colours:

Discover 23 colours
- interactive at www.gunold.de
- real thread colour card

- ◆ **Minimum order:**
1 Miniking cone of 1.000 m

Especially for patterning:

drawer box with one Miniking cone each in all 23 colours.

Professional materials for high-quality embroidery results – tried and tested in the clothing, promotion and home textile industries. For more information visit our website www.gunold.de!
