

# STIFFY

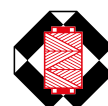

Pre-Cut Backings

**Easy, quick and convenient –  
pre-cut backings save time, waste  
and off-cuts**

Remove packing foil and just use pre-cut sheets one after another. Place sheet onto embroidery hoop, position fabric on top then frame both and you are all set to start embroidering.

**GUNOLD®**

## Technical Information:

Available are five different varieties of STIFFY backing, sealed in foil packs of 250 sheets each.  
 Time saving - high productivity - cutting of backing no longer needed!

### Tear-Away Nonwoven:

STANDARD 100  
 EAA 14318  
 TESTEX

◆ **STIFFY 1650, colour white and black**

For firm to heavy-weight fabric types.

- ◆ **Make-up:** 250 sheets á 20 x 20 cm; +/- 1 cm  
 250 sheets á 35 x 40 cm; +/- 1 cm

◆ **STIFFY 1995, colour white**

For heavy-weight fabric types.

- ◆ **Make-up:** 250 sheets á 10 x 18 cm; +/- 1 cm

◆ **Processing recommendations:**

- Hoop the base fabric with the nonwoven in an embroidery hoop and embroider the design.
- Remove the hoop and carefully tear away the nonwoven.

Time saved by simply tearing away the backing means higher productivity during embroidery process.

### Cut-Away Nonwoven:

STANDARD 100  
 EAA 14318  
 TESTEX

◆ **STIFFY 2040, colour white and black**

For light to heavy-weight fabric types.

- ◆ **Make-up:** 250 sheets á 20 x 20 cm; +/- 1 cm  
 250 sheets á 33 x 40 cm; +/- 1 cm

◆ **STIFFY 1950, colour white and black**

For heavy to medium-weight fabric types.

- ◆ **Make-up:** 250 sheets á 20 x 20 cm; +/- 1 cm

◆ **Processing recommendations:**

- Hoop the base fabric with the nonwoven in an embroidery hoop and embroider the design.
- Remove the hoop and carefully cut away the nonwoven along the finished embroidery edges using small scissors.

Cut-away backings are characterized by a high puncture resistance while embroidering.

### Iron-on Nonwoven:

STANDARD 100  
 EAA 14318  
 TESTEX

◆ **STIFFY 1640B, colour white**

For medium-weight knits (polo shirts).

- ◆ **Make-up:** 250 sheets á 20 x 20 cm; +/- 1 cm

◆ **Processing recommendations:**

- Iron the nonwoven on the wrong fabric side before embroidering (for time and temperature settings see individual product instructions).
- After finishing the embroidery, remove the nonwoven through tearing or cutting away.

The iron-on backing provides more stability for elastic fabrics and prevents puckering during embroidery process.

The size of these pre-cut sheets is very user-friendly since it corresponds to the size of most embroidery designs. There are 250 sheets in each foil pack.

- ◆ **Available upon request:** Additional varieties of the STIFFY and TEXTI range of stabilizers. Pre-cut sheets are available in virtually any size requested.

Professional materials for high-quality embroidery results – tried and tested in the clothing, promotion and home textile industries. For more information visit our website [www.gunold.de](http://www.gunold.de)!
