

KK FILM

Double sided self adhesive film

The (almost) all-purpose adhesive!

Appliquéing is a piece of cake with KK FILM: the double-sided, self-adhesive film fixes the fabric to be appliquéd without ironing. Coat the appliqué fabric with KK FILM, cut out the desired shape, stick it onto the base fabric, embroider - and you're done! This is a quick and easy way to produce appliqués with clean edges - no cutting out by hand. The self-adhesive film can also be heat activated - simply transfer the film to the appliqué fabric and activate it with an iron or ironing press. This increases the adhesive strength and effect of KK FILM.

GUNOLD[®]

KK FILM

Main Applications:

- ◆ For cold and hot fusing of appliqués.

Processing Recommendations:

Application with self-adhesive film:

1. Stick KK FILM to the reverse side of the appliqué and press firmly (calender, Welger wood).
2. Cut out the appliqué, by hand, laser or cutting plotter.
3. Remove backing paper.
4. Place the appliqué with the adhesive side on the the base fabric or foil SOLVY 80.
5. Finish embroidering the appliqué with satin stitch edge.

Application for thermal fixation:

1. Glue KK FILM to the back of the appliqué fabric. Press the fabric with the ironing press or iron the fabric.
 - Temperature: 100 - 120 degrees Celsius
 - Pressure: 4 bar
 - Duration: 5 - 10 s
2. Cut out the appliqué, by hand, laser or cutting plotter.
3. Remove backing paper.
4. Fix the appliqué with the adhesive side to the the base fabric or foil SOLVY 80.
5. Finish embroidering the appliqué with satin stitch edge.

Technical Information:

◆ Material:

Double-sided, self-adhesive film, additionally heat activatable
100% polyacrylat

Adhesive: water-based polyacrylate.
Solvent-free, ageing-resistant and permanently elastic

Cover: white silicone paper

- ◆ **Weight:** Adhesive: 15 g/m²
Silicone paper: 93 g/m²

- ◆ **Colour:** transparent

◆ Make-up:

Rolls 100 cm x 25 m
50 cm x 25 m

◆ Minimum order:

1 roll
