

STICK-PROTECT

Fusible Protective Gauze

Beautiful Embroideries Don't Have to Irritate Your Skin ...

... if they're covered with the soft protective fusible STICK-PROTECT! Especially in fine, soft materials seams and embroideries can be irritating to the skin. STICK-PROTECT is ironed on the wrong fabric side to completely cover the finished embroidery design – durably, even after frequent washing.

STICK-PROTECT not only gives a smooth surface to coarse patterns. It's also ideal for permanently reinforcing collars and trimmings of fine fabrics when used as fusible interlining.

GUNOLD[®]

STICK-PROTECT

Main Applications:

- ◆ Fusible protective gauze for everything irritating to the skin.
- ◆ Permanent fusible interlining for fine fabrics to reinforce collars, trimmings and cuffs.

Processing Recommendations:

- ◆ Place STICK-PROTECT with its adhesive coating on the wrong fabric side and press it on with an iron or ironing press:

Temperature: 120-130° C | Time: 10-14 seconds | Pressure: 3-4 bars

Care Instructions:

TIP:
Cut STICK PROTECT generously - round off corners - approx. 2 - 3 cm larger than the embroidery design.
