Product and Material Compliance Statement

for the products of Gunold GmbH, Obernburger Str. 125, 63811 Stockstadt

To ensure the marketability of our products, we base our work on all currently applicable legal regulations that set requirements for our products and specifically for their components.

For this purpose, we – or our external partner, asseso AG – maintain constant contact with our suppliers to ensure that all delivered products comply with the legal requirements regarding their chemical composition. In addition, all our suppliers are obligated to proactively and promptly report any changes.

In the event that individual products contain substances subject to notification, GUNOLD GmbH will inform customers – on a product- and customer-specific basis – in accordance with the SVHC information obligations under REACH Art. 33.

Furthermore, we would like to inform you of the following:

GUNOLD GmbH acts as a "downstream user" in the EU under the **REACH Regulation** (EC) No. 1907/2006. Any REACH registration obligations for substances in our products lie within the upstream supply chain. Corresponding safety data sheets for relevant product formulations are available and can be provided at any time.

PFAS: We are not aware of any of our products requiring per- and polyfluorinated chemicals to define their properties. Furthermore, our suppliers have confirmed that no PFAS substances are contained in the products. PFAS are regulated in the EU under REACH and the POP Regulation. Detailed **PFAS information** is available for download on our website: https://shop.gunold.de/en/certificate

POP Regulation (EU 2019/1021): Our supplied articles do not contain persistent organic pollutants (POPs).

RoHS Directive 2011/65/EU: Gunold GmbH distributes only textile products, which do not fall under the scope of the RoHS Directive. At the present time, we can nonetheless assume that RoHS limit values are being met.

Conflict Minerals Regulation (EU) 2017/821: The delivered products and their packaging do not contain minerals from risk or conflict areas according to the Conflict Minerals Regulation (EU) 2017/821, which establishes due diligence obligations for Union importers of tin, tantalum, tungsten, their ores, and gold (3TG) from conflict-affected and high-risk areas.

Proposition 65: Substances listed under Prop 65 – similar to SVHC – are not prohibited substances but must be disclosed for marketing products in the USA. We will gladly provide product-specific information upon request.
