Statement on PFAS and possible restrictions

The marketability and compliance of our products are at the center of our considerations. We are aware of the relevance of the PFAS discussions and are intensively addressing this issue.

GUNOLD GmbH provides products needed for finishing textiles, especially embroidery. To our knowledge, none of our products require per- and polyfluorinated chemicals to define the product's properties.

Currently, all our suppliers have confirmed that they do not add any PFAS substances themselves and that their upstream suppliers have no information that PFAS are present. According to our information, we thus have PFAS-free production and PFAS-free processes. Therefore, we do not expect any negative impact on our product range.

To continue ensuring this, we regularly inquire with our suppliers whether the goods, chemicals, and textiles supplied to us are free of any PFAS ingredients, or if PFAS are used in production and contamination can occur. We will inform immediately in case of any changes.

Since the group of per- and polyfluorinated chemicals is estimated to comprise more than 10,000 different substances, we can only make detailed statements once specific regulations/resolutions are in place. Current information by the responsible ministry in Germany (Federal Ministry for the Environment, Nature Conservation, Nuclear Safety and Consumer Protection) are published here: BMUV: Per- und polyfluorierte Chemikalien (PFAS) | Cluster

Additionally, you can find our Product Compliance Statement available for download on our website at https://shop.gunold.de/en/certificate
