

## Extra-Fine Bobbin Threads for Embroideries

# The Optimum Bobbin Thread for Perfect Embroideries!

A fine and smooth yet tear resistant bobbin thread is indispensable for the processing and special impact of embroideries. BOBBY is the ideal complement for high-quality upper threads.

Its prewound version BOBBY FIL is extremely convenient for multi-head embroidery machines: ready-to-use bobbins with an even thread delivery and identical length of thread for every single bobbin. This guarantees easy handling and extremely short change-over intervals when setting up the machines.

## Bobbin Thread on Cones:

- ◆ BOBBY SYN 130
- ◆ BOBBY SYN 100
- ◆ BOBBY COT 100

All cones for self-winding are wound on recycled tubes.

Care Instructions:

STANDARD  
100

Tip: Remove flat spring when using BOBBY FIL CORE MAGNETIC

Product name	Fibre type	Material	Description	Colour	Thread strength	Make-up	Minimum order
BOBBY FIL 110	synthetic fibre	100 % polyester	Continuous filament thread	white, black	Nm 130/2; dtex 77*2	white 120 m black 110 m	144 bobbins
BOBBY FIL 120	synthetic fibre	100 % polyester	Continuous filament thread	white, black	Nm 120/2; dtex 83*2	white 140 m black 120 m	144 bobbins
BOBBY FIL CORE MAGNETIC	synthetic fibre	100 % polyester	Continuous filament thread	white, black	Nm 130/2; dtex 77*2	white 120 m black 115 m	144 bobbins

### Advantages of ready-to-use bobbins:

- Even thread delivery
- Practically lint-free processing
- Precisely equal runlength of all bobbins, i.e. they're finished simultaneously.
- Significantly greater runlength
- Only one step necessary for setting up machines with bobbin thread, thus extremely low downtimes.

Professional materials for high-quality embroidery results – tried and tested in the clothing, promotion and home textile industries. For more information visit our website [www.gunold.de](http://www.gunold.de)!
