

Sparkling Metallic Ribbon Thread

GUNOLD®

GLITTER

Processing Recommendations:

- ◆ **Thread Tension:**
As for all metallic threads, a loose thread tension is extremely important.
- ◆ **Thread Unwinding:**
For processing on the machine, it is essential to pull the enclosed net over the cone - this guarantees an even thread unwinding.
- ◆ **Needle:**
Use universal needle Organ 75/11 SES or special needle for metallic threads Organ DBx7ST strength 75/11 SES, in case of difficulties.

- ◆ **Bobbin Thread:**
For best results, use BOBBY SYN 120 or 130.

Tip!

The metallized foil creates particularly beautiful effects on embroidery motifs with wide satin stitches with a low stitch density. Especially suitable for decorative stitches and seams.

Care Instructions:

Technical Information:

- ◆ **Upper thread**
- ◆ **Composition:**
50% polyester, 50% polyethylene
- ◆ **Size 30:**
final strength: Nm 54 (1ply); dtex 185 (1ply)
(Anm.: 1 Faden = 1ply)
- ◆ **Spool size:**
diameter: 66 mm, height: 67 mm
- ◆ **Minimum order:**
1 cone of 6.000 m
